Donation to the trust are exempt from
income tax under section 80G of the income tax act

Dear well wisher,

It is our proud privilege and pleasure to put this third annual report in your hand. Although, this is third report, in reality, the activity started from May 2011. More than nine thousand operations have been carried out till date. This includes Retina operations, Glaucoma, Squint, pediatric surgeries, Corneal transplant operations etc. in addition to the routine cataract surgeries. More than 100 corneal transplant have been done by now, of which 60 patient regained sight.

With the grace of GOD, this difficult task has been performed by efficient doctors and workers with sincerity, affection and feeling towards patients. Donations have also been forthcoming regularly otherwise, this would not have been possible.

Though the workers are sincere and hard working, they are still comparatively new to the field of eye care and the workload has increased substantially in short time so they find it difficult to manage the work. Their competence, experience and speed at work are falling short in matching with the workload. And so, we have kept a one point agenda for the new year to make sure that their competence and speed should increase and necessary inputs are being given for the purpose. We have not planned any expansion of the work this year. We have started a hostel for the blind children from June-2013 onwards.

Next year's priority also includes putting the training activities on a stronger footing. We shall give priority to training of outside workers.

We are forced to plan construction work on the piece of land behind the hospital which we have procured and create training centre including class room, conference room, meeting hall, dormitory, guest house, eye bank and partial expansion of the hospital by creating optical fitting room, record room, store, kitchen etc. We are going to add fourth operation theater on the first floor replacing existing staff quarter. Over & above all this, we have started overall development work in Peterkui & Pipalvan villages of Mandvi Taluka.

We are sure of our march ahead in the years to come with whole hearted support from well wishers and donors - individuals & organisations for this worthy cause, the way it has happened in the past.

Bharatbhai Shah

President

01/08/2013

Nalinbhai Shah

Secretary

Dr. Uday Gajiwala

Vice President

Mandvi.

The year at a glance

An executive committee meeting was organized in the beginning of the third year. A second meeting was held in December 12.

The work of eye care of Netrang and Zankhavav community health centres was entrusted to Divyajyoti Trust from April 2012. This work was previously done by Sewa Rural, Jhagadiya.

The Community Based Rehabilitation programme for incurably blind people was started from April 2012. Formal inauguration of the same was done on 20th May when the first annual day was celebrated. A meeting of corneal transplant patients was held in the morning. In the evening, during the main function, Rotary Club of Surat, roundtown people formally handed over the corneal trnasplant related equipments to Divyajyoti trust which were procured under a matching grant project with the Rotary club of Bergen Highland, New Jeresy, USA. Similarly Kakrapar Atomic Power station officers announced to donate vitrectomy machine which will be very useful in performing vitrectomy. This will be done under their CSR head.

We started efforts for getting ISO certification early this year. Protocols were prepared for every machine, Instrument, activity etc. with the help of our consultant Shri Rushangbhai Sheth from Surat and then Mr. Nikunjbhai of M/s Nimubs Certifications Pvt. Ltd. came from Mumbai for inspection in October and certificate was given after in depth observation of all the protocols. Now Tejas Eye Hospital is certified under ISO 9001 : 2008.

A video documentary showing the activities and available facilities in the hosptial and also the objectives of the trust was prepared both in English and Gujarati for publicity and fund raising activity.

12 different pamphlets on different diseases have been prepared for health education purpose. A pamphlet educating common man about the use of computers titled "computer vision syndrome" is being prepared. A two years' calendar has been published with health education messages on differrent eye diseases on each page.

A paper was presented by Dr. Udaybhai on results of the survey of blindness conducted by Dr. Rohanbhai at All Gujarat Ophthalmic Conference in September in Surat. We feel proud to note that this paper has won the best scientific paper award and will be presented at AIOC in Feb. 2014 at Agra.

A meeting of all the sarpanch of Mandvi taluka was organised on 2nd Oct. - Gandhijayanti. More than 100 leaders remained present. They were informed about our activities and about the rehabilitation activities. A meeting of the camp organisers & sponsors was organised on 4th Nov. but the attendance remained low as Diwali was close. However, those who attended the same, made useful suggestions for future.

In house training of Ophthalmic Assistants and Ophthalmic nurses has become an ongoing activity now. A theoretical exam of the technical staff was taken on 3/11.

Our president Shri Bharatbhai Shah underwent a cataract operation with multi focal IOL in Nov. He expressed satisfaction about the work signifying the quality of work.

On World Handicapped Day (3rd Dec) - a get to gather of handicapped people of Mandvi taluka was organised at Punamwadi in Mandvi. More than 90 handicapped people with their attendants remained present. They were informed about the Govt. Schemes and about our efforts to help blind people. We are thankful to management of Punamwadi for their whole hearted support in organising such functions.

We wanted to remain eco friendly right from the beginning and so we had installed solar street lights, solar water heater etc. And water recharge borewell was also constructed. Recently, we met a consultant on the subject - Mr. Ameetsinh Waghela of Carrbon Earth, Ahmedabad who has promised to help us and so an energy audit was conducted by an outside agency and now we are planning to convert hospital electrical load into solar energy in stages.

Kakrapar Atomic Power Station officers handed over the cheque for the vitrectomy machine in February at a small function and that machine has now become functional.

Dr. Nikhilbhai Sardar, paediatric Ophthalmologist came specially from H. V. Desai Eye Hospital, Pune on march 15 and performed 7 surgeries on paediatric patients.

A permission of eye donation centre was granted by (NPCB) National Programme for Control of blindness to Divyajyoti Trust.

Divyajyoti Trust was registered as a member of Vision 2020 in the year 2012. Dr. Udaybhai was appointed as president of Vision 2020: Right to Sight Gujarat chapter.

HOSPITAL ACTIVITIES

The rate at which the activities have grown was tremendous. More than 43000 patients were examined and 5870 operations were performed including base hospital, Netrang and Zankhvav CHCs and weekly twice diagnostic eye camps.

Daily OPD average has reached up to 100, on Monday and Thursday (local holiday) more than 150 OPD is being seen. Once on 10/12/2012 OPD reached up to 165. Since this was anticipated, plastic chairs were purchased for waiting area.

Dr. Parimal Chariwala has joined us as medical officer from May 2012. She will take care of the management of the operation theatre also.

Dr. Rohanbhai, Dr. Khushbooben and Dr. Udaybhai took up the challenge of managing the workload during shortage of doctors from Sept. 2012 onwards when Dr. Sheetalben was on maternity leave and Dr. Kaminiben was in phaco training.

Every month 30 to 40 ratina operations are being carried out after arrival of posterior vitrectomy machine in January 2013. The no. Of glaucoma patients is also high and Dr. Rohanbhai is handling this work.

Trauma related to fire crackers seen during Diwali days. This year 3-4 patients came within a week due to cracker injury. Two of these kids had picked up fire crackers which did not blow off and had eye injury. Parents still don't take proper care inspite of continuous instructions being given on TV and radio. Though due to presence of Dr. Udaybhai during diwali days, we could help these patients get immediate treatment.

No. Of corneal transplants have crossed 100 by the end of this year and it is a matter of pleasure and pride as this much transplant work is not being done anywhere in Gujarat except Civil Hospital, Ahmedabad.

Availability of Eye Bank Specular Microscope has made it possible to assess the quality of the donor cornea which eventually will improve the outcome of surgeries. However, since the awareness about eye donation is lacking badly in the area, sometimes, patients don't turn up after good quality donor material becomes available inspite of repeated phone calls and sending vehicles to get the patient to the hospital. We are forced to reject good quality donor material under such circumstances. We have started taking a refundable deposit of Rs. 200/- from the patient whoever registers himself for transplant.

This year, for the first time, we have performed cataract surgery on both the eyes of a 6 months old baby. Since paediatric ophthalmologist Dr. Nitin Jain comes regularly on last Wednesday of every month, we have been able to perform 23 paediatric surgeries.

Hospital activity report

THE WHOLE FAMILY'S DELIGHT

Savitaben Vasava a young lady of 35 yrs. from village Pipalwan Ta. Mandvi visited Tejas Eye Hospital with her husband Mr. Maganbhai, age 40 & two daughters 5 years & 1 year old. She complained of loss of vision in both eyes and was diagnosed with mature cataracts in both eyes and was advised surgery as soon as possible.

Being labourers, they were hesitant in undergoing surgery thinking about the cost of surgery. Our counsellor convinced them that here surgery will be done totally free including lodging & boarding and medicine & spectacles are provided totally free. After counselling, Savitaben agreed for surgery & cataract surgery was carried out one by one on her eyes. Now, she is able to see and happy with the restored sight.

For almost a year, she had remained blind and was neither able to perform household chores nor care for the children. Now, she is able to take care of household chores and look after the children also. In fact, she has started going for farm labour & is earning.

The family is very happy as Savitaben is able to do everything including income generation. Now they will guide other people from their family as well as society who have eye related problems to Tejas Eye Hospital.

Family Feel Relaxed

Salamabibi Yusufkhan Pathan of Mandvi town is mentally challenged lady aged 40. She is illiterate and naturally unmarried due to her mental condition. At the age of 40, she developed cataract in both her eyes. Family's problems got compounded due to blindness. After one year of remaining blind, family member brought her to Tejas eye hospital. Examination and diagnosis were made with great difficulty and counselling.

She had to be operated under general anaesthesia. When she regained consciousness, she was uncomfortable and she removed the bandage and rubbed her eyes. Again our staff counseled her with lot of patience and kindness. Very next day her second eye was also operated. Now she is able to see clearly and so very happy.

Because of her blindness and mental retardation, her family members were facing lots of problems and discomfort. Now one problem is solved so family members feel relaxed and very thankful to Tejas eye hospital. In spite of their poor economic condition they have paid hospital bill and will send other persons also to the hospital.

Diagnostic Eye Camps:

The basic objective of Divyajyoti Trust is to provide eye care services to the population in and around Mandvi at their doorsteps & so diagnostic eye camps were started from the beginning. 73 diagnostic camps were organized last year (June' 11 to march' 12) - more than 16000 patients were examined and 1600 were operated.

This year (April 2012 to march 2013) totally 109 diagnostic camps were organized and total 16787 patients were examined, 2280 Operations performed and 10756 spectacles were distributed. A facility of 40 seats bus for two way transportation, free surgery, free post operative medicines and spectacles and free lodging boarding for 1^{1/2} days to the patient and one relative is provided to patients. Due to this facility and quality of work, the patient response is good from the beginning.

Donors are also coming forward to support the camp activity. Just like last year, we have received good help from Shri Ram Narayan Chandakji of Maheshwari Samaj- Surat, Shree Bahadursing chauhan & Shree Arvindbhai Bhatt from Kosamba, the members of Sargam builders- Surat & charitable trusts from Baroda - Hariom Sewa trust and Jivan Akshay Trust. District Blindness Control Society, Surat is also supporting us. Over & above these, we have received good co-operation and financial help from Kakrapar Atomic Power Station, Tribal subplan Mandvi - Dist. Surat, Vision Foundation of India, Mumbai and shree Omprakashji Tuteja for camp activity.

Statistical details of the diagnostic eye camp organised during the year (April 2012 to March 2013)

Training Activity

All the members of staff were sent to Arvind eye hospital, Madurai in 2 groups in May 2012 and June 2012 to observe the work, and understand it because Arvind eye hospital is the biggest hospital of the world, and more than 4 lacs eye operations are conducted in 5 different cities. Over and above this, research training and production of IOL and other materials is also done there. All suggested some reforms after this visit and they were implemented to the extent possible.

During July 2012, Dr. Khusboo went to Coimbtore for one month training in ROP at her own expenses. During this time Dr. Amish patel from Ahemedabad and Dr. Madhaviben sheth from Baroda came here to sustain the work. Similarly, Dr. Kamini went to Visnagar for phaco training.

As per the recent Central Govt. Notification, Ophthalmic Assistant can also perform enucleation and so Shree Pradipbhai patel and Yatinbhai mistry went to Lokdrashti eye bank for 2 days training, now they will do this work.

Over and above this the training for ophthalmic assistant and ophthalmic nurses was conducted in the hospital itself and subsequently absorbed in the hospital.

A written exam of all the ophthalmic assistants and nursing staff who have completed their training before hand was taken during the year.

Training of staff from other hospitals:

Ms. Kinjalben panchal and Sharadaben from Jamna Ba trust, Bardoli came for training for operation theater work. Tarulataben chaudhari came as a pharmacists observer during September.

One doctor Dr. Daudet came from Congo, Africa for SICS training for 3 months. After wet lab training on goat eyes, Dr. Rohanbhai trained him in SICS. Dr. Daudet is back to his country and making good use of the training received here. Dr. Daudet and his institution have shown pleasure for this training.

Management staff and O.T. Staff from one hospital of Khunti Dist., Jharkhand came for a short training in operation theater technique during November, December. Similarly SHIS staff members came from Sundervan, West Bengal for O.T. Management for one week.

Dr. Margiben came for one week phaco training from Sewa rural.

Natasha kapoor from London and Suhal shah from America came here to see the working of hospital and understand the problems of poor rural community in India. They wrote letters describing their experience -these are reported on page no. 29 & 32.

Consultancy & Evaluation :

Dr. Udaybhai had gone for evaluation work of different hospitals on request from Sightsavers. Pradipbhai accompanied him to Sundervan hospital.

Sr.	Name	Place	Date	Purpose	Remark
1	Sewa sadan eye hospital	Bhopal	6-7 sept.12	Hospital evaluation	SSI partner
2	RNC eye hospital	Valsad	28-29 sept.12	Hospita evaluation	NGO

Workshop and conference :

Dr. Udaybhai attended community ophthalmology society of India (COSI) , annual meeting. Primary Eye Care was discussed in depth in this meeting. Divyajyoti trust also has become a member of this COSI. It has been decided to hold the next Annual meeting of COSI in Mandvi most probably on 22-23 Nov. 2013.

Other useful activity to society :

One camp was organized at Mandvi hospital with the co-operation of Divyajyoti trust by Lions Club of Surat Silk City for the people having difficulty in hearing. 125 people were examined and 75 patient were provided hearing aid. Every patient was provided this aid as per their income certificate either free of charge or partially free.

During Diwali, one wellwisher distributed Sweets in 500 poor families of Mandvi and people experienced sweetness of Diwali. After Diwali the same donor distributed 500 sarees and kirana kits to poor people of Lakhgam area and received blessings of the people. These noble and generous gentlemen are torch bearers of social service.

Another gentleman, came to know of the activities and expressed desire to help the poor people. He visited Mandvi and distributed clothes to people.

Trustee shree Bharatbhai, Balubhai, Udaybhai, Madhaviben, Ramnarayanji and shree Omprakashji went to Dang area in September 2012 to see the activities in under developed villages conducted by Bhansali trust. Based on that, we examined possibilities to develop needy villages in Mandvi taluka. After detailed survey with the help of CBR workers, three villages are selected -funding for this work will be provided by Chhanydo. One MSW worker is selected from January 2013 to handle this field work.

Help to other NGOs:

Dr. Udaybhai helped Jeevan Jyot trust hospital in the purchase of OT equipment and preparing OT drawing. He inaugurated the OT also.

We helped one health center in village Jambuda, Taluka Valia run by Jeevan Akshay charitable trust in conducting diagnostic camp at their site, conducting school screening and in training their workers.

Activity in Netrang and Zankhvav area :

Govt. Of Gujarat has constructed separate eye OT at Netrang and Jhankhvav CHCs and we are taking care of day to day functioning of the eye care at these centres under public private partnership from April 2012. Daily OPD is run by the ophthalmic assistant posted there by Divyajyoti trust. Team of Ophthalmologist and nursing staff visits these centres on Tuesday and Friday to perform surgeries. The performance statistics is given on page 6 in the report.

School screening activities :

The guardians and the school going children are not aware of the eye problems of school age children so if the school going children are examined and needy children are provided spectacles timely and other problems are treated in time, the serious sight threatening complications and blindness can be prevented in future. That is why school screening activity carries lot of importance.

A time table was prepared for school children eye examination under our Community Based Rehabilitation Programme. The local ophthalmic assistant posted at CHC was also helpful in this activity.

250 students were examined in Mandvi high school. They will be provided spectacles by DBCS Surat. 540 students were examined in Vankal high school and refraction was carried out for 230 children. 10 students were referred to base hospital for detailed examination. 360 students were examined in Baben school and 120 refraction were performed. Out of them 8 children were sent to base hospital. 660 students were examined in Astan girls school, 185 refractions were performed and five girl students were sent to base hospital.

Benefit of school screening

Tarunkumar Garasiya of village Vanskui, Ta. Mandvi, Dist. Surat. Studies in Std. 8 of Vanskui Govt. School. His father is a labourer so his economic condition is very poor.

Once there was a school screening programme by our CBR workers. During eye examination of the students of vanskui school, Tarunkumar was also examined and found to have low vision in his left eye. Then he was referred to Tejas Eye Hospital.

When Tarunkumar approached the Tejas Eye Hospital and he was examined thoroughly, he was diagnosed with cataract in his left eye. As he is not an adult, his surgery should be done by a pediatrics ophthalmologist. Luckily we have a visiting pediatric ophthalmologist Dr. Nitinbhai Jain, who visits hospital once a month. So Tarun's surgery was planned according to his visit and being operated by him in the presence of an anesthetist.

After cataract surgery in his left eye; he is now able to see. As his father is landless labourer and has RSBY card; the cataract surgery was done totally free and now his vision is also improved.

If school screening programme would not have been planned, Tarunkumar would have become blind in one eye. So school screening programme is an important instrument to eliminate avoidable blindness among school children and hence helpful for National blindness control activity.

Community Based Rehabilitation - Community Eye Services Programme

Community Based Rehabilitation programme was started in Mandvi Taluka from April 2012 covering a population of 2 lacs in 133 villages. First of all 133 villages were divided in 10 clusters, one worker was selected from each cluster and were informed about their cluster. Workers completed their module one training in 15 days in 1st week of May. Followed by door to door survey of blindness. Blood sugar and urine sugar examination of all the individuals above the age of 40 years was included as an integral part of this survey which is a unique feature. In addition to all this, a study of the social situation of the people was also combined. Diagnostic eye camps were also organized alongside in respective villages with a very good response due to hard work of the workers- average 150 OPD patients were seen and about 15 operations were conducted.

Workers gave a referral slip to all those in need of eye care. Those coming with these slips were treated free of charge including operations. Daily, patients with refer slips were walking into the hospital during the survey time. We received an overwhelming support from the community for the work which was not anticipated. These villagers did not know of their diabetic status.

Work done by CES workers in Mandvi Taluka

Every week 1 or 2 patients with 500 mg/dl blood sugar level were walking into the hospital totally unaware of being diabetic. This way many people with diabetes began to take treatment. Although this was difficult for us but people will be benefitted tremendously because long standing diabetes invites many diseases. If people will know about it early and take regular treatment, many complications can be prevented. Workers have really poured their heart out in this activity.

2nd module training of these workers was carried out in November after survey was over in October. Computer data entry of this survey was done afterwards which also took a long time. All the credit for this survey in Mandvi taluka alongwith study of social situation and door to door screening for diabetes goes to this team of workers. For training of the workers shree Vikrambhai Vansadia from Sewa rural came for 2 days. Workers benefitted from his vast experience and teaching method. One supervisor and one braille teacher involved in CES programme have worked previously in rehabilitation projects and their experience also proved beneficial.

To make workers understand the situation of a blind person, they were made to do all the day to day household activity including cooking, preparing tea, moving about, crossing road, climbing stairs etc with blind folds. Workers moving about with blind folds was a sight for the community around. Workers were sent to Blind People Association, Ahmedabad for one week as a part of training. They were amazed to see how easily blind people were doing their routine activities. Workers visited their Sayla project also. They also visited C. U. Shah Pragnyachakshu Mahila Sewa Kunj, Surendranagar as a part of their training and observed cooking competition for blind girls and a mass marriage ceremony for blind girls. They learnt a lot from this.

Now after two modules of training and visit to BPA, Ahmedabad, workers have understood the problems faced by blind people in their daily life. The actual rehabilitation work started from Dec."12. Totally 115 blind persons including 10 children were found in Mandvi block. We have ensured enrolment of all these children in regular schools and we are trying to make sure they don't drop out from the school. We have sent one girl to Surendranagar for higher education and we are trying to send more girls there. One young man from Ghantoli was sent to Tatavadi, Fansa for 2 years training but he came back, now we are trying to send him to Junagadh.

A week long workshop for blind children was organized during Diwali -14 children from Mandvi, Jhagadia, Valia, Dediapada and Ankleshwar participated. They learned braille to some extent during the week and visited zoo at Sarthana (Surat), went to the garden and played cricket. These children were invited by the priest of Bilkeshvar mahadev (old broken bridge) for lunch and gave blessing, another gentleman from Mandvi gave Rs. 5000 cash for the expenditure of the workshop and one cloth merchant in the market paid for one dinner of pavbhaji. It proves that humanity still exists in our society. These children displayed their talents in the musical evening with songs and music on one of the days which was enjoyed by the staff members and their family. We have decided to organize next workshop in May vacation.

Mandvi taluka sarpanch and leaders were called for a meeting on 2nd October so that we get good co-operation and they know the details of the programme. It was well received. All the sarpanches, leaders guaranteed in one voice to help us.

Thus CES programme is progressing well. Generally blind children do not study at home, so if hostel facility is provided and they study in Mandvi school, they can achieve better academic progress - life skills can be taught and their overall development ensured. So, we are considering a hostel facility for these blind children in Mandvi from next academic year. Ajendrabhai sunwa, Ganeshbhai dodia and Rajeshbhai chaudhari visited the hostel for blind students at Saputara for this purpose.

Eye donation awareness :

If cornea transplant can be done to some cornea patients, they can regain vision and they can be saved from the curse of blindness. Eye donation can be done by the dead person (who has decided before his death to donate his eye) or by his relatives. However awareness about eye donation is lacking badly in our area. The orthodox beliefs - such as eye donation will damage the face, person will be born without eyes in next berth, It may be wasted etc. do not allow people to donate eyes.

We tried to bring awareness about eye donation in 4 different villages during the eye donation fortnight between 25th Aug. to 8th Sept. One ophthalmic assistant from the hospital showed video and discussed with the people and did question and answers. Dr. Udaybhai gave speech thrice during the year to groups of primary school teachers

Thomas Dater of Ramsey (c) receives the "Dr. William H. Kelly", award of Community Service, shown here with Thomas Dunn and Roy Polizzi

More Club News

continued from page 6

BERGEN HIGHLANDS/RAMSEY

The Bergen Highlands-Ramsey Rotary Club (www.bergenhighlandsrotary.org) recently presented the Dr. William H. Kelley Community Service Award to Thomas Dater of Ramsey at its annual Installation Dinner on June 5, 2012 at the Ramsey Golf and Country Club.

The award was presented to Mr. Dater by Rotarian Tom Dunn.

Mr. Dater was editor and publisher of Ramsey's Home and Store News, and was recognized for his many years of community involvement and service to the area. The Bergen Highlands-Ramsey Rotary Club is pleased to honor this tireless community contributor with the Dr. William H. Kelley Community Service Award.

Dr. William H. Kelley, in whose honor the prestigious award is given, was a member of the Bergen Highlands-Ramsey Rotary Club for over 50 years with perfect attendance. He was chairman of the Club's yearly Blood Drive and played Santa at local nursing homes. He held the Club's highest Paul Harris award and served on many Rotary district committees, working with over 50 clubs in the regional Rotary district.

Dr. Kelley was a founding member of the Happy Heartbeats Clown Group, which brought laughter and magic to many children-in-need groups, including Tomorrow's Children at Hackensack Hospital. He was a tireless worker for countless community groups and activities for decades.

Right: District 7490 Newsletter editor Tom Grissom gave blood during the Bergen Highlands-Ramsey Club's recent drive.

INDIAN MASTER GRANT

As members of Bergen Highlands, you should be very proud of Vijay's work and dedication to this matching grant. As indicated, PDG Raj did a lot to assist on the administrative side. A worthy use of Rotary Foundation funds combined with a vision by a fellow club member. Congratulations to all!

Letter to Gov Emil as follows:

You will be very happy to note that under your leadership, our district - 7490 and our club - Bergen Highlands Ramsey Rotary, completed a worthy international project, which is going to help correct the eyesight of thousands of people in India. Please accept my sincere thanks and appreciation for agreeing to undertake this worthy project; and giving me an opportunity to serve the club as well as the district.

I also wish to acknowledge guidance and assistance by PDG Raj Bhatia. His support was immensely helpful.

Please proudly communicate this accomplishment to the District Staff; as well as, the district newsletter; if you feel appropriate.

With Regards and sincere thanks.

Vijay Dalal
Rotarian - Bergen Highlands Ramsey

On the 20th May 2012 at 5.30 PM we handed over the equipment promised under the M.G.No. 76485 to Tejas Eye Hospital Mandvi, Gujarat, India.

The Hospital had arranged a big meeting inviting local dignitaries and some revered blind people who are working for the rehabilitation of the sightless people.

More than 200 persons attended. I will be sending a completion report along with all the accounts in the near future.

This is just to inform you of the project status.

With warm regards
PDG Kulbandhu Sharma

Reach Within To Embrace Humanity

About Rotery matching grant project-Rotery Bergen Highland
New Jeresy- news letter

on eye donation, paediatric eye problems and also facilities available in the hospital. 70-80 Teachers remained present every time. This way, we tried to develop awareness about eye donation among teachers and guardians.

Divyajyoti trust is now registered with the Govt. of Gujarat under human organ transplant act (HOTA) for performing corneal transplants and also as base hospital with DBCS, Surat.

We have completed 100 corneal transplants by the end of this year with a 60% success rate. However, only 7-8 times we have received corneas from local area. All the rest of the donor material was procured from Lokdrashti Eye Bank at Surat.

Our Visitors :

Visitors from different section of the society came during the year. They increased our enthusiasm and became helpful in our journey ahead. Following people visited us.

Members of Surat Iron and Steel Merchant Asso.; Shree Karsanbhai Prajapati from Sargam Builders, Surat; Dhansukhbhai patel, Rameshbhai and Hashmukhbhai from Vihan, Omprakashji tuteja; Founders of Ur-Asha javeri foundation Shree Arunbhai & Smt. Ashaben javeri, Lions club of Surat silk city and Leo club of Surat members, Shree Ashokbhai Bhansali (Bhansali Trust), Shri Kulinkant Luthia from Bombay, members of Rajasthan Yuva Sangh; Dr. Bhadraben Shah & Dr. Bharatiben Malik (Share & Care Foundation, USA) from America; Dr. Ashvinbhai & Dr. Yashvantbhai Patel (Combat Blindness Foundation (USA)); Dr. Diptiben Parikh (USA).

Following persons saw the activities of hospital & made suggestions : Dr. Sangram & Nupur patil- Dr. Parande (Maharashtra), Dr. Pankajbhai, , Dr. Chhabra (Kim), Dr. Prafulbhai sirohiya (Lokdrashti Eye Bank, Surat), Dr. Ramanikbhai and Dr. Bhanuben mehta (Devdaya Charitable Trust, wankaner).

Similarly Govt. Officers - secretary shree Anilbhai Patel, Tribal administrator Mr. P. K. Desai, District Development Officer, Dr. Pritiben Kapadia (HOD, Eye Dept.) and Dr. Shivaniben from Surat Civil Hospital, officers from ONGC & KAPS visited our institute.

Following NGO membres also visited us - PNR society Bhavnagar, Shri Rajeshbhai Jhaveri from Jivan Akshay CharitableTrust, members of Lions club of Bardoli, President of South Gujarat Productivity Council, office bearers from Rotary International district 3060. Dr. G.V. Rao from Vision 2020 Right to Sight India, Shri Niranjانبhai Pandya (Founder) & Col. Dr. Deshpande (CEO) from H. V. Desai Eye Hospital - Pune, Shri Bharatbhai Desai from RNC hospital Valsad, Shri Haribhai of Netra Sewa Trust, Rajpipla.

Natasha Kapoor Experience (Student - London)

I was fortunate enough to get the opportunity to be an observer at the Tejas Eye Hospital run by Divyajyoti Trust. The Hospital is situated in a rural area in the Surat District, Gujarat, India. The hospital was inaugurated in May'11 and is providing advanced eye care - all thanks to the highly skilled staff of the hospital. The hospital has a Retina and Corneal Eye Specialist and also a visiting Pediatric ophthalmologist. The hospital has its own Pharmacy and Opticians. It helps the poor people in the area who cannot afford to go the city hospitals and get ophthalmic treatment.

I spent ten days there & wished I could stay longer. Every Wednesday & Sunday a team comprising of a doctor, optician, optometrists and admin. staff go to rural areas around the hospital to carry out free eye tests. The patients are given glasses if required, some can afford it & the ones who can't are given free of charge. The patients with other eye problems are taken to the hospital in a coach and dropped off after their surgery. Majority of these patients are old people with cataracts and mostly come from a farming background. It is heart wrenching to see how these old people have no one to look after them and are so poor that they can't afford a meal a day. The hospital charges them nothing for the surgery and for the three days stay with food.

The hospital has two field projects going on - One concentrates on educating blind children & other on rehabilitation of blind adults. The field workers have managed to go into every household in the 40 km radius & find out all the blind people. The field workers not only help the blind person but also look after their families' needs.

The hospital sends a doctor and two nurses two days a week to the local Government hospital to carry out cataract surgeries. I was lucky to have observed these surgeries and understand the aetiology of the disease and the surgical procedure. I even observed retinal surgeries like vitrectomy and macular hole surgery. The hospital did its first cornea transplant as well during my stay there.

The hospital has a Counselor for pre and post surgery counseling. She informs the patients about all procedures & charges, which are bare minimum if applicable. She has the tough job of convincing some of the old people as to why it is important for them to get their surgery done as soon as possible and provide them with solutions for their problems. This is a hard job as the patients generally are of a farming background & can't afford to not go to the fields which provide them their food for the family every day. This is usually a classic problem for the male population. The female population refuses surgery even when they are being done for free, as there would be no one to look after the kids and the old people in the house.

In my ten days I did learn a lot about the medical aspect of eye care but the most important thing I learnt was to value what I have. There are people who cannot afford the basic necessities in life in the third world but do not complain and are happy in their lives. The first world should definitely learn from them.

Staff Welfare Activity :

Many different programmes and tours are organized so that staff members may work with unity and enthusiasm and family relationship can develop. Tour to Kanyakumari and Rameshvaram was organized along with a visit to Arvind eye hospital of Madurai. Flag hoisting ceremony was carried out on 15th August and 26th January. A 1^{1/2} days workshop was organized with known educationist Shri Jyotibhai Desai on the subject of good parenting. A small picnic was organized for the children of the staff to Sarthana Nature Park, Dumas and Ambika Niketan temple. For Diwali celebration staff children enjoyed fire crackers, staff prepared rangoli and also a dinner get to gather was arranged. One well wisher distributed sarees to all the staff members. Shree Bhalchandrabhai shukla distributed clothes and blankets to our cleaning staff. A visit to Kakrapar atomic plant was arranged on demand by the staff. A picnic was organized to Saputara for staff with family on 26th Jan.

Research Activity :

Since Dr. Rohan is working with us who has done a one year M. Sc. In community Eye Health course from ICEM London, we are undertaking research activities regularly. A rapid assessment of blindness (RAAB) study was carried out in the year 2011-12.

We have received funding for another study - Rapid Assessment of Visual Impairment (RAVI) from Dorabji Tata trust. Planning for the study is sampling was done by Dr. Rohan and then field work for data collection will be done from April onwards by prior disbursement of information to the local community and leaders. The results of this study will help in planning of our activities to eliminate blindness and particularly help us in planning refractive error services.

Our paper prepared by Dr. Khushboo on "Irvin gaas syndrome" is published in December issue of DOS TIMES. Similarly our paper based on the survey -Rapid Assessment of Avoidable Blindness was presented in Gujarat ophthalmology Society annual conference which won first prize. Same paper was presented at IAPB meet and ISGEO meet in Hyderabad and was praised. The same will now be presented at AIOC in Feb. 2014 at Agra. Dr. Khushboo presented a paper on "Effect of Anti VEGF drug in Retinal Vein Occlusion" at AGOC, Surat. Both these were presented at AIOC in Jan. 2013 at Hyderabad as a poster.

Award and Honour :

Iron and steel merchant association Surat honoured this noble work by giving a citation to Divyajyoti trust. Dr. Udaybhai was invited in annual function of Lions club of Surat silk city and honoured the activity done by Divyajyoti trust. Rotary club of Ahemedabad Mahanagar gave vocational excellence award to Dr. Udaybhai.

Future Planning:

- ✍ Plan to send Ophthalmologists for further training abroad.*
- ✍ A weekly OPD at KAPS township will be started soon.*
- ✍ Construction for expansion of the hospital and training centre is planned behind the hospital in the piece of land purchased after completion of the legal formalities.*
- ✍ Training activities with formal affiliation with university will be started for Ophthalmic assistants. Courses will be offered to Ophthalmologists in SICS & phaco, to ophthalmic nurses, in spectacles fitting and to OT boys.*
- ✍ We are planning to start awareness generation activity in the near by areas for eye donations.*

Our Problems and Difficulties :

Awareness of patients and their relatives about post operative care is lacking.

Those patients who require corneal transplant also, do not come early because of ignorance & so sometimes good cornea received in donation goes waste.

Work has increased rapidly in just two years' time, so staff lacks in efficiency and accuracy. The next year's slogan is to improve the same.

Patient run away from the hospital without permission (when needed to stay longer) and occassionally physically attacked our staff when we go to bring them back.

In rare cases they take wine and play mischief at night in the hospital. Due to bad habit of taking wine they put others in difficulty.

Construction work to create facility can't be done due to delay in legal formalities.

Staff attrition particularly among driver cadre.

Vision 2020 right to sight India : Gujarat chapter :

Dr. P.N.Nagpal- the founder president of Vision 2020 right to sight Gujarat chapter (2006 to Mar. '12), has handed over that responsibility to Dr. Uday from April '12. He has done following activities during the year.

(Continue - Page No.33)

An Eye-Opening Experience

Suhal Shah

Poverty; what do we know about the way people suffer under these abject conditions? What does this word mean to us? Most of us cannot even begin to fathom abject poverty until seeing it for ourselves. This summer, I had a life-changing experience when I was afforded the chance to spend some time at Tejas Eye Hospital, a charity hospital in rural India. The hospital's motto has always been, "No one should become blind or remain blind needlessly for want of services."¹ I was told that most villagers earn a daily average of 26 rupees, which is roughly less than fifty cents per day.² With this meager income, they must build a home, raise children, and buy food. Forget about electricity because even the simplest necessities of everyday life such as a bar of soap are considered a luxury for most. As for their health, all they could do is pray that they would not fall seriously ill.

With the support of donors from around the world, an old 16,000 square foot diamond factory was transformed into a forty bed eye hospital that can provide necessary eye care to those in need for little to no cost depending upon the patient's financial conditions.³ After opening its doors on May 22, 2011, Tejas Eye Hospital has served thousands of needy people just in the surrounding areas alone. Its location was carefully selected to be built in a small town called Mandvi (population 25,000) within the state of Gujarat, so healthcare providers have easy access to four tribal areas that are in dire need for medical support and counseling.⁴ In addition, the hospital provides free meals, a place to sleep for both the patient and one relative, and transportation to and from the hospital. One afternoon, as lunchtime approached, I watched the procession of post-operative patients, each with an eye patch from surgery and a relative guiding them towards the cafeteria. When I looked into their tired eyes, I saw pain and fright. Many of these patients did not even have shoes to wear, and I could tell that they were grateful for the rare assurance of a hearty meal for that day.

In the Out Patient Department, Dr. Uday Gajiwala (vice-president and one of the founders of the hospital) and his colleagues screen the patients for cataracts and retinal problems, prescribe medications for eye infections, treat allergies, remove foreign bodies, and much more. Hence, patients can get their vision tested and then go

down the hall to select a frame for their glasses at the hospital's store, which sells glasses at a subsidized cost (or free if the patient cannot afford it). As for medications, the hospital pharmacy not only dispenses ophthalmic medications, but they also carry medications for a variety of problems (such as diabetes) at discounted prices.

Since diabetes can cause permanent damage to the retina, patients are urged to visit the hospital on a yearly basis. The hospital has its own retina clinic to diagnose and treat retinal problems caused by other pathologies such as diabetes. I had the chance to follow hospital workers while they conducted field surveys as they walked from door to door in tribal areas to run diagnostic vision tests and test for diabetes. Along with on-foot surveys, the hospital sets up biweekly make-shift clinics in selected areas to provide free eye care services and diabetes testing. Those needing surgery are provided transportation to the hospital on the same day.

I was fortunate enough to have unprecedented access to the OR, scrubbing in for over twenty-five cataract surgeries performed by Dr. Rohan Chariwala. Within the first ten months of opening its doors, 2900 out of 3600 operations performed were cataract surgeries.⁴ One of the hospital's success stories involved surgery on a six-month old baby boy born with congenital cataracts.¹ In rural areas where children with disabilities would face many societal prejudices, surgeries like this improve the physical as well as the social aspect of life. The same concept applied to a nearly blind twenty-one year old female that I met before her treatments. Such circumstances would have left her as a social outcast, making it difficult for her to get married. Still, opportunities are provided for those who have permanent blindness as well. The hospital has a teacher who moves throughout the tribal areas to teach Braille. This hospital is not just providing medical care; it is providing love, relief, and hope for a brighter future.

Hence, whatever your definition of poverty may be, there are ways to help those living in these conditions. Whether you are involved in raising awareness or donating to these causes, you contribute in helping to end the cycle of poverty. For more information about this hospital, visit <http://www.divyajyotitrust.org/index.htm>

This year's World Sight Day celebrations took place in Anand and Vadodara on 10-11 Oct. With major emphasis on glaucoma being one of the major causes of blindness..

Workshop on "Planning of Refractive Error services" organised in Surat on 16th Dec. Was attended by more than 75 delegates. Community Ophth. Chief from AIIMS, Dr. Praveen Vashishtha and Dr. Col. Deshpande - President + Dr. G. V. Rao - CEO of Vision 2020 Right to Sight India Programme attended the same. Their presence was very useful for the participants. Our sincere thanks to them.

Case study - Holkiben vasava

Holkiben Vasava aged 70 yrs. of village Saha, Ta. Mangrol, though she has a son, she lives alone. Once there was a diagnostic camp in her village and she approached the same. During her examination she was diagnosed with cataract in both her eyes. As she was alone; another lady who was supposed to undergo cataract surgery herself, took the responsibility of Holkiben. The diagnosis was confirmed upon reaching the hospital. After surgery in her one eye, Holkiben started behaving funny at that night. She tried to run away from her place, abused other patients and even slapped one relative. Because of her mischievous behaviour some people tied her hands and legs. But she didn't calm down. Finally we were compelled to give her sedatives so that she would sleep calmly and also other patients could sleep. When she woke up in the morning, she was completely oblivious of her naughty behaviour.

The lady, who cared for Holkiben is happy because she can now see very well and is ready to help other patients like Holkiben in spite of her mischievous behaviour.

Even this could be reward of our services

Bhagabhai Karsanbhai Vasava aged 65 yrs of village & Tal. Valia, Dist. Bharuch had deamness of vision in both eyes. Bhagabhai lost his wife 3-4 years back. He has two sons and a daughter. He is residing with his daughter and son in law. He had cataract surgery in both eyes elsewhere but IOL was not implanted during surgery so Bhagabhai was referred to us for secondary IOL which was done in absence of his relatives. But next morning, he ran away from hospital without informing anybody. The outsiders seeing him with patch on his eye called the hospital. Upon getting informed, 2-3 staff members ran after him and found him at village Vareth-Petiya 3-4 km away from the hospital. Here, Bhagabhai opposed our staff and one of the staff was even bitten by him but our staff member did not lose his temper and convinced him to return to the hospital. Finally Bhagabhai returned to hospital with our staff members & received post operative care and restored vision in that eye.

After this episode, Bhagabhai visited office thrice for his follow up but he doesn't have the slightest idea about what he has done. In spite of all our efforts, he ended up with another injury to the eye and finally lost vision after two more operations.

21. Nileshbhai Patel	Dashrath, Vadodara	Ozonizer - 1

My Loving Mother !!

Oh, Almighty Lord !

*I do not aspire to have glory and wealth
but a loving & caring mother !*

*The one who carried me in her womb
for nine months & passed through
Suffering doing so.*

*You, my mother are great who endured the pains of labor,
Who made me read and wright,*

*I bow up to you again and again, oh my birth giver !
I may be foolish in the eyes of worldly people,
but for my mother I am the million dollar jewel.*

*At the end of all hardships of material world,
Your lotus feet are holy places of pilgrimage for me.*

*I was searching peace in each material thing,
but did not know you are the
True guide and source of peace.*

After long time, I am now fully enlightened.

Oh ! Almighty, I want you but in the form of mother !

*Oh Lord ! punish thousand times for every single sin of mine but
Please do not bereft me of mother !*

- Dr. Rohan Chariwala

*One can hide the facts by smart talking, however his eyes
will never tell a lie. We can identify the inner truth, if his
eyes are not straight and steady.*

*The way, the diseases of our body can be identified by
examination of the tongue, spiritual diseases are identified
by examination of the eyes.*

- Mohandas Karamchand Gandhi

*Keep your eyes pious, always speak the truth.
Search the GOD within yourself.*

- Poet Premal
